Enjoy the Fall Wether...

Missiv #98 for Sept. 2009 Sis Mynda in Heven

In This Issue:

Schoaf's Out, watercolor; artist Theo Halladay

Sleeping Balinese, sketch; artist Sylvia Holland

In adidion to the latest Missiv, this month brings to our website the third installment of my adventure, "How I Got Into This Work", the story as I told it to my yung tenent Jeol Arman, who was curious about the exciting things that heppend wen I first started cultivating the gift of proffecy.

We also now ad the story of the Balinese cats, bred by my artist mother, Sylvia Holland. These ar the beautiful, intelligent breed wich she spent her "retirement" years developing and bringing to championship sho status in all the leading cat asociacions. Fynd the story under The Saga/Animals.

Plus we giv u another hidden picture puzzle from my Augsburg series: Moses in the Cart of Pharaoh. It shows Moses as an atentiv pupil studying the lore of Egypt - lots of things hidden as usual for kids and grownups to fynd. Look in Fun and Action.

Welcome to this 4th issue of Missiv Magazine!

We continue with the cover letter as befor [below] for the Missiv, plus we hav ogen a poem for u this month...one u shud remember if u ar over 60.

Be sure to visit the website itself, www.wertheliving.org, to fynd, under Proffecy, this month's Missiv from heven. Plus chek out the new hidden picture puzzle, the article on the Balinese cats, & Part 3 of my oan personal story, along with the older materials that ar beginning to bild into an arhive, and the shopping items.

Note about the poem:

Sum of us older folks remember singing this as a turn of the century community song. My reproducing it here is mor than just nostalgia, tho. The Golden Rule shud certonly be taut in all scools, belonging as it dus to all religions and all frendly cultures: "Du unfo others as u wud hav them du unto u."

We cud also uze a bit mor hickory stik; but the concession we shud make in return is to replace our ridiculus inglish spelling with an updated one that is mor rasonal and less an electist code. Du we realy need 11 difrent ways of spelling the sound ee? We ar requiring the seprat memorizing of up to 50,000 words. Wy, wen there is so much else to lem? Wy, wen our disorganized spelling teaches boys to despize scool and evrything it stands for?

Let's update our spelling.

scool Days

Scool days, scool days,
Dear old golden rule days -
Reading and riting and 'rithmetic
Taut to the tune of a hik'ry stik.
I was yur queen in calico,
Yu wer my bashful barefoot bo,
And u rote on my slate, 'I luv u so'
Wen we wer a cupple of kids.

Friends - re Missiv #98 for this month, Sis Mynda in Heven: I am as usual revealing for the first time sum information that has cum to me from my conversations with heven.

Specificly, du I dare to reveal on erth the fact that heven was having a hard time of it until recently? In any war, it beheves the military leaders to play down the setbacks and play up the triumphs, the victrys. This has also been the practice among those who ar informed about wot goes on in heven. U hear about the victory that is to cum, about how evry noo wil bow to God, and to the goodness and plenty that only he can provide. This may all be true, but wot u mite not hear is that meanwhile things arnt going so weel. In my 40 years of comunication with the other world I hav herd much too much - of the negativ.

One reason I - and other sycics on erth - hear so much negativ input from Voices is that the rebels agens God hav been very anxious to convince the people of erth that THEY rather than God wer winning the war. In a patronizing tone of voice they hav announced, to erth's lisseners, that they ar the enlightened - that they - & they ar very evasiv about who they ar - hav a mentality far beyond that of erth. They talk like Mr. Spock on Star Trek, who always claims that his planet is mor advanced than erth.

I am happy to be able to tel u that these kno-it-alls ar rong. It's tru they hav been able to inflict damage on the brains and boddys of erthlings. They hav in fact dan much harm - not so much on erth as in heven itself. That's one reason wy the christian church has herd so little by direct proffecy since the time of Cryst. And it's wy the church has wond us not to lissen to Voices. The Voices hav too offen been moastly recordings coming from rebels in sheel - computers set up by the attackers, the rebels, the enemies of God. Deemans if u like, & lyers they ar. They make gloig promises to individuals that they hav no intention of achualy fulfilling, as they did to my tenent Vince who was able to hear them, in 1980. They ar like the devil who tempted Chryst with promises on the pinnacle of the temple.

I tel u, in this Missiv, that those I contact in heven ar sleepy. They ar just waking from the ded. However these ancient ones ar not so sleepy that they cannot remember, reopen comunication and counteratak agens the enemies of God, for sum hours each day. This is cuming on mor and mor. I rejoice to be able to pass sum of the details along to u, as I du in this Missiv. Those of u who keep reading my Missivs ar gradually getting the picture. With luk, with God's blessing & with Karen's help, I will be able to keep filling it in for u as these momentus events continue.

Luv,
Theo
